TREE REPLACEMENT REQUEST FORM

When funds are available to the Freehold Township Shade Tree Commission (STC) to install replacement Street Beautification (SB) trees along the roadway frontage of our home, we would be interested in becoming involved in this program and we will agree to the following conditions:

1. Give permission to the STC to install SB tree(s) along the roadway frontage of our home on private property.
2. After notification from the STC that a tree replacement program is active, and for the purpose of our approval, we will check the proposed locations of the trees selected for planting along the roadway frontage of our home.
3. That we will care for the new tree planting(s). For example; add water to the tree bed as needed; maintain a weed and grass free tree bed; maintain a 2"-3" thick layer of wood mulch which is not piled against the tree trunk; notify the STC of any disease or insect concerns or with any tree care questions.
4. Consent to the STC's return within 6-10 years for a one-time-prune for better form, branch strength and aesthetics for the planted trees.
